🌐 <https://github.com/Ammariz99>

I am an experienced front-end developer specializing in designing and implementing user interfaces that are both visually appealing and functional. My expertise ensures alignment with industry standards and user experience best practices, leveraging modern web development technologies to deliver exceptional results.

## Experience

- **Programmers-Force**

March 2024-August-2024

As an Associate Software Engineer at Programmers Force, I worked on diverse projects, collaborating with talented teams to develop innovative solutions. This experience enhanced my technical expertise and sharpened my problem-solving skills, enabling me to deliver results that consistently exceeded expectations.

## Projects

- **Recordly**

Contributed to Recordly, a live audio recording and transcription platform with offline capabilities. Involved in developing and maintaining workspaces, managing user interactions, and enhancing user experience.

- **WhistleIt**

Developed WhistleIt, a communication platform focused on secure messaging and collaboration.

Implemented key features such as user authentication, team creation, direct messaging, and channel management. Integrated TipTap editor for rich text editing and managed state using Vuex to ensure smooth and efficient user interactions.

- **E-commerce Store**

Built an e-commerce platform with user authentication, CRUD operations for products, product listing, and order management including total amount calculations. Utilized fake APIs for data handling and simulation to manage product inventory and process orders.

- **Chatwave Social Media App**

Developed a social media app using core HTML, CSS, and JavaScript. Managed user authentication, profile management, and post creation with comments. Used a fake API for adding posts, comments, and displaying content based on user profiles.

## Education

- **High School**

ICS-Physics

2017-2019

- **University of Management & Technology**

Bachelor of Computer Science

2019-2023
